Profile

Master's student in Data Science at the University of Catania, with a background in programming, statistical analysis and predictive modeling. Skilled in Python, SQL and R, Machine Learning, Deep Learning, Data Visualization and AI Engineering, with hands-on experience in libraries such as Plotly, ggplot, Matplotlib, Streamlit, PyTorch and TensorFlow, and a strong interest in applying data to solve business problems.

Thesis: Analysis and comparison of predictive models for wind turbine anomaly detection through an LLM-based agentic system using Retrieval-Augmented Generation (RAG).

My full projects can be explored on my GitHub portfolio: github.com/sergiotambe

Education

Master's Degree in Data Science — University of Catania September 2024–present

LM-DATA

Training in data analysis and preparation with **Python, SQL and R**; application of statistical methods and **supervised and unsupervised machine learning** algorithms, data mining and time series analysis. Study of **deep learning and neural network** techniques, including computer vision applications, as well as optimization methods and complex data analysis. Knowledge of Business Intelligence and Data Visualization through **Streamlit and Power BI**, and of Data Protection Law, including the principles of **GDPR and personal data protection**.

Erasmus+ — Universidade do Porto February–July 2026 | Portugal

International mobility during the master's program.

Bachelor's Degree in Economics — University of Catania October 2021–December 2024

Grade: 103/110. Foundational training in economics, statistics and business disciplines.

Technical Skills

Languages: Python, SQL/MySQL, R.
Data science and machine learning: pandas, NumPy, SciPy, scikit-learn, TensorFlow, Keras; data preparation, supervised and unsupervised models, neural networks and time series analysis.
Visualization and tools: Streamlit, Power BI, Matplotlib, Seaborn, Airtable, Excel and Office tools.

Experience

Intern — Fieldgood October–December 2025 | Catania

- Collected, organized and analyzed data using Airtable, building dashboards.
- Created and managed surveys and chatbots, with automated data extraction and collection.
- Operational support for the Meetingood platform, and testing/quality control of chatbots and questionnaires.

Intern — Tax - Accounting June–July 2024 | Barrafranca (EN)

- Collected and verified data for tax returns and managed client documentation.
